

Creative Cabinetry

"The beauty & authenticity of reclaimed wood simply cannot be reproduced with new wood & antiquing techniques."

Homestead Cabinets:

- Much of the cabinetry we manufacture comes from reclaimed lumber rescued from old barns or "homestead" buildings which were likely on their way to the landfill or to be burned.

Enjoy the beauty and warmth of real wood without consuming non-sustainable resources.

- History is woven into new & modern designs as this "old growth" lumber is reborn for a look you must see, to believe.

We offer new woods considered "sustainable", i.e. Bamboo, Lyptus & Cork.

- Our door styles & finishes are creative, unique & second-to-none in awe inspiring originality.

"Petro" miles?

Homestead Cabinetry is located in Hyrum, UT, 490 miles from the Creative Cabinetry showroom.

Conversion Varnish

Ultra-low volatile organic compound (VOC)

Homestead offers water based finishes, oil rub finishes, polyurethane finishes and low VOC conversion varnish finishes for all their cabinets. This allows a clear top coat that is completely free of toluene, formaldehyde, acetone and paint thinner. Not only is their standard conversion varnish classified as "low VOC", it is economical and provides superior mar, water, solvent and household chemical resistance. By the time Homestead Cabinets reach your home, "off-gassing", in general has been minimized and harmful off-gassing has been virtually eliminated.

SDF

Sustainable Design Fiberboard

Medex

Medex represents the highly versatile ideal of Sustainable Design Fiberboard (SDF). This product is a powerful combination of **moisture resistance**, superior medium density fiberboard (MDF) board properties, including 100% post-industrial recycled wood fiber and a formaldehyde free adhesive system.

Medex is engineered for interior high moisture areas in nonstructural applications in place of sanded plywood and solid wood.

Medex is the ideal choice as it surpasses the most stringent global emission standards.
